

D-W SURFACTANT PLUS™

NO FOAM, NONIONIC SPREADER-ACTIVATOR

ACTIVE INGREDIENTS:

Alkyl Aryl Polyoxyethylene Glycols, IPA and Dimethylpolysiloxane	80%
Constituents ineffective as a spray adjuvant	20%
TOTAL	100%

All ingredients are accepted under CFR 40, 180.1001 (c).

CAUTION

KEEP OUT OF REACH OF CHILDREN

May be harmful if swallowed. Avoid breathing spray mist. Wash hands after use. Avoid contact with eyes and skin. In case of contact with eyes, flush thoroughly with water and seek medical attention. Wash concentrate from skin with water. If swallowed, do not induce vomiting. Dilute with water. Seek immediate medical attention. Do not store near feed or food products.

GENERAL INFORMATION

DW-SURFACTANT PLUS is a water soluble, nonionic spreader-activator type surfactant, designed for use in improving wetting and deposition of pesticide spray on leaf surfaces.

DW-SURFACTANT PLUS decreases the surface tension of the spray droplets allowing for increased spreading and more uniform coverage on leaf and stem surfaces.

USE DIRECTIONS

DW-SURFACTANT PLUS can be used with agricultural, industrial, forestry, aquatic and turf products that recommend a wetter-spreader type adjuvant. Add pesticides and other related products to the spray mixture before adding **DW-SURFACTANT PLUS**.

NOTE: Always follow pesticide label recommendations.

STORAGE AND DISPOSAL

Do not store near heat or open flame. Store in original container. Do not reuse empty container. Triple rinse (or equivalent) into spray tank then dispose of or recondition container through the regulations set by local and state authorities.

HERBICIDES

DW-SURFACTANT PLUS is recommended for use at a rate of 0.5 to 2 pints per 100 gallons of spray with most post emergence herbicides which recommend the use of a nonionic surfactant (unless otherwise directed by the herbicide manufacturer).

DEFOLIANTS

DW-SURFACTANT PLUS is recommended for use at a rate of 2 pints per 100 gallons of spray when applied at a application rate of 10 or more gallons per acre. Use a rate of 4 pints per 100 gallons when the application is less than 10 gallons per acre.

INSECTICIDES, FUNGICIDES AND ACARACIDES

DW-SURFACTANT PLUS is recommended at a rate of 2 to 8 ounces per 100 gallons of spray to enhance the wetting of insecticides, fungicides or acaracides.

SOIL PENETRANT

DW-SURFACTANT PLUS should be applied at a rate of 8 ounces per 1,000 square feet of turf. Applications should be made in a minimum spray volume of 12 gallons of water per acre.

WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk or any such use.
