

OCTANE 10-18-4

GUARANTEED ANALYSIS

TOTAL NITROGEN (N)10.00%

AVAILABLE PHOSPHATE

(P₂O₅).....18.00%

SOLUBLE POTASH (K₂O).....4.00%

Derived from: Urea, ammonium hydroxide, phosphoric acid, and potassium hydroxide

Net Weight: 10.62 lbs/gal Net Contents: _____

Specific gravity: 1.28 pH: 6.5-7.0 clear water white Liquid

One hundred percent of the phosphate is present in the orthophosphate form that is immediately available for plant absorption and metabolism.

- maximizes plant nutrient solubility
- minimizes salt index
- minimizes equipment corrosion

In the state of Florida this product is guaranteed by Triangle Chemical.

CAUTION:

KEEP OUT OF REACH OF CHILDREN
READ AND FOLLOW LABEL DIRECTIONS

Manufactured for:

TRIANGLE CHEMICAL

IN-FURROW RECOMMENDATIONS

CORN: 3-4 Gal per acre in furrow.

GRAIN SORGHUM: 2.5 Gal per acre in furrow.

POTATOES: 4-10 Gal per acre should be placed so that potato seed piece drop into fertilizer

PEANUT: 1 GAL per acre with the inoculant.

COTTON: 1-2 GAL per acre 2X2, do not use in furrow.

FOLIAR FEEDING GENERAL GUIDELINES:

Corn: 1-3 gallons per acre. Foliar apply at the 3rd- 5th leaf collar, and then 10-14 days later**

Soybeans: 1-3 gallons per acre. Foliar apply at the 4th-6th trifoliolate, and then @ 80-85% podset **

Vegetable Crops: Use 1-2 gallons per acre with 8-10 gallons of water every 7-10 days on vegetable crops starting 10-15 days after transplant or at 2" –5" tall on seeded crops.

Other Row Crops: 1-3 gallons per acre.

**Additional crop nutrients such as micronutrients and slow release nitrogen can be added, as well as most herbicides, insecticides, and fungicides. Consult your distributor or agronomist for specific fertility recommendations.

MIXING INSTRUCTIONS: Liquid fertilizers can mix with many crop production products. Some non-100% EDTA chelates may not be compatible. In a small container prior to full scale mixing, proportionally mix all the components to confirm compatibility. Thorough mixing of all blends is important.

Do Not mix with calcium containing products unless the calcium is fully EDTA chelated

Do Not mix fertilizers with hard water. Mixing with hard water may cause clogging of lines due to the combining of calcium, magnesium and iron in the water with phosphate in the fertilizer.

Seller warrants that the above product conforms to its chemical description and is reasonably fit for the purpose on the label when used in accordance with directions under normal conditions of use (including normal weather conditions). Neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product when used contrary to the label instructions or under abnormal conditions (including abnormal weather conditions). And the buyer assumes the risk of any such use Octane starter or foliar applications are intended to supplement existing soil fertility programs and will not by itself provide all the nutrients normally required by agricultural crops.

WHAT TO DO IN CASE OF CONTACT

If Ingested: Give large amounts of water or milk, if conscious. Contact a physician immediately.

Eye Contact: Flush eyes with clean water for 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing and wash skin with soap and water. Seek medical attention if irritation develops or persists.

If Inhaled: Move to fresh air and seek medical attention if irritation develops or persists.

For additional information call CHEMTREC 800-424-9300

If there is contact made with spray solution containing pesticide and/or spray adjuvants, follow the "Statement of Practical Treatment" on the product label.
