

CORRECT pH[®]

SURFACTANT / PENETRANT / ACTIVATOR

PRINCIPAL FUNCTIONING AGENTS:

Phosphatidylcholine, Propionic Acid and Alkyl Polyoxyethylene Ether	80%
INERT INGREDIENTS	20%
TOTAL	100%

All ingredients are exempt from tolerance requirements under 40 CFR 180.1001 (d).

KEEP OUT OF REACH OF CHILDREN

DANGER

Combustible liquid. May be harmful if swallowed. May be harmful in contact with skin. Causes serious eye damage. Read label before use. Keep away from heat/sparks/open flames/hot surfaces – No smoking. Keep container tightly closed. Keep only in original container. Avoid breathing dust/fume/gas/mist/vapors/spray. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection. Store in a well-ventilated place. Keep cool.

SLIPPERY WHEN WET

SEE BACK OF CONTAINER FOR STATEMENT OF FIRST AID AND GENERAL INFORMATION

NET CONTENTS: 1 U.S. Gallon (3.79 L)

Manufactured For:

TRIANGLE CHEMICAL COMPANY

117 Preston Ct., Macon, GA 31210

478-743-1548

GENERAL INFORMATION

CORRECT pH may be used as an acidifying agent to prevent alkaline hydrolysis. Alkaline sensitive pesticides may be susceptible to pesticide degradation via alkaline hydrolysis or high pH conditions.

CORRECT pH is a non-ionic low foam surfactant, which may be used with herbicides, insecticides, fungicides, acaricides, defoliants, desiccants, plant growth regulators, and foliar nutrients to enhance their effectiveness in the plant. Ground or air applications are applicable.

CORRECT pH also adds surfactant qualities by reducing surface tension which assists in better wetting and spreading, enhancing penetration of the pesticide spray solution into the plant.

Aquatic applications are permitted.

GENERAL USE

Herbicides (Terrestrial or Aquatic), Defoliants, Desiccants:

1 to 4 pints per 100 gallons of spray mixture when used as a surfactant/penetrant. 12 ounces to 2 pints per acre when used in place of crop oils.

Insecticides, Fungicides, Acaricides, Plant Growth Regulators, Foliar Nutrients: 1/2 to 2 pints per 100 gallons of spray mixture.

Turf, Ornamental and Industrial Spraying: 1 to 4 pints per 100 gallons (1 to 3 fluid ounces per 5 gallons) of spray mixture. This product demonstrates good plant safety; not all species have been tested. Prior to treating a large area, test on a small area and observe before full-scale application.

DIRECTIONS FOR USE

Acceptable for use with aquatic herbicides when used as directed with the appropriate herbicide.

CORRECT pH may be used on assorted crops including row crops, natural crops, forage crops, vine crops, vegetables, fruits and stone fruits, citrus, small grains, turf or in noncrops. Refer to pesticide manufacturer's label regarding definite adjuvant use recommendations and usage rates.

ACIDIFYING AGENT

> **pH 8.0:** 8 - 16 ounces / 100 gallons of spray solution.

pH 6.5 - 8.0: 4 - 8 ounces / 100 gallons of spray solution.

NOTE: CORRECT pH is an acidifier and may be physically or chemically incompatible with alkaline/basic spray ingredients.

FIRST AID

Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present, after the first 5 minutes, then continue cautiously rinsing eye. If eye irritation persists: Get medical advice/attention.

IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash it before reuse. Wash skin with plenty of soap and water for several minutes. If skin irritation occurs: Get medical advice or attention.

IF SWALLOWED: Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person. DO NOT INDUCE VOMITING.

IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

STORAGE AND DISPOSAL

Storage: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

Disposal: Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all federal, state and local regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org.

WARRANTY: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk or any such use.
