

# TOPNOTCH 515 FEATURES

## BENEFITS OF TOPNOTCH

- It is a Nitrogen/Potassium formulation that contains both Manganese and Boron that is critical for pod development
  - and proper fill during the crop growing cycle
- The Potassium is derived from Potassium Acetate for quick uptake of the potash while increasing translocation of all other nutrients in the tank.
- It contains Humic Acids for a “metered” translocation of all tank mix products throughout the plant, while aiding in soil uptake of nutrients.

## RATES:

Add 1-2 Quarts at V3/V4, R1/R4.

## COMPATIBILITY:

TOPNOTCH 515 is compatible with most fertilizer and pesticide combinations. Always jar test when mixing with a combination not previously reviewed.
