

MSO PLUS™

MODIFIED SEED OIL WITH ORGANOSILICONE

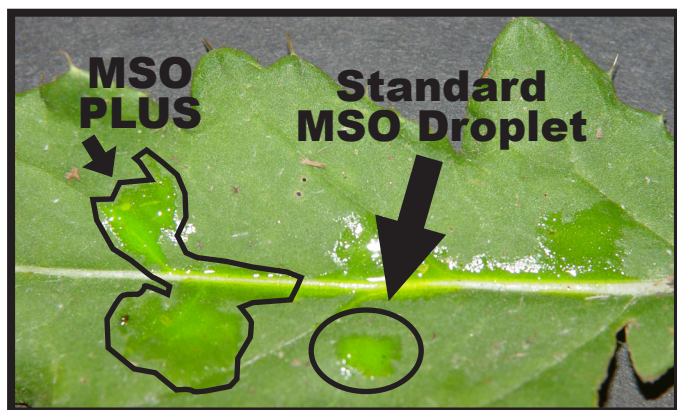

MSO PLUS is a specially designed adjuvant system, with the combined penetrating power of modified seed oil, and the super-wetting properties of organosilicone surfactant.

It delivers extra performance under difficult spray conditions...

- ◆ During periods of low relative humidity and temperature extremes.
- ◆ When using lower spray volumes less than 15 GPA.
- ◆ When target species exceed size guidelines on herbicide label.
- ◆ Under periods of stressful environmental conditions.

When spray water is treated at the rate of 1 qt per 100...

- ◆ Surface Tension is reduced.
- ◆ Spray Droplets spread better with a lower contact angle.
- ◆ Wetting Time is more than 4x faster than untreated spray water.
- ◆ Lower use rates compared to MSO or COC (1% v/v)

Approved Applications
Agriculture, Aquatic, Non-Cropland,
Forestry and Turf.

Suggested use rate
25% V/V
