

SILICONE 100

A NONIONIC WETTER / SPREADER / PENETRANT SURFACTANT

TRICARD SILICONE 100 is an 100% organosilicone surfactant, based on organo-modified siloxane technology for use in water based pesticide formulations.

TRICARD SILICONE 100 is a highly effective nonionic wetter / spreader / penetrant surfactant. Proper management of the spray solution is essential. Monitoring of spray patterns, droplet size, and contact with the target surface is recommended to determine proper and efficient pesticide applications. This will optimize the pesticide and surfactant load levels.

TRICARD SILICONE 100 has been proven to be a highly efficient surfactant. Timing, weather conditions, methods of application, crop conditions, and/or mixture with other chemicals may have to be adjusted accordingly.

Recommended Use Rates	(ounces) per 100 gal of Spray Solution:
Herbicides	6 - 13
Defoliants	6 - 13
Insecticides / Miticides / Fungicides	4 - 8
Plant Growth Regulators	1.5 -13.0
Aerial Applications	12 - 16
Micronutrients	6 - 13
Liquid Fertilization	6 - 13
