

CROSSFIRE

LOW FOAM - CROP OIL CONCENTRATE

SUPPLEMENTAL LABEL

THIS SUPPLEMENTAL LABEL MUST BE ACCOMPANIED BY THE MAIN LABEL THAT CONTAINS THE REQUIRED SAFETY AND WARRANTY STATEMENTS. THIS LABEL MUST BE PRESENT WHEREVER THE PRODUCT IS BEING USED FOR THE PURPOSES AND FOLLOWING THE DIRECTIONS STATED ON THIS LABEL.

GENERAL INFORMATION

CROSSFIRE may be used as deposition aid for enhanced performance of pesticides. **CROSSFIRE** may be applied by ground, or air, or may be used with soil applied herbicides. Use **CROSSFIRE** with most pesticides and fertilizers, as allowed on their labels. **CROSSFIRE** reduces, but does not eliminate fines, and therefore will enhance deposition as more active is taken to the target surface. The combination of ingredients also may aid in increasing the rate of uptake of pesticide that is absorbed by the plant.

DIRECTIONS FOR USE

Follow the directions on the pesticide label. This product may increase phytotoxicity of some mixtures on certain susceptible foliage or fruit. The user must have experience with the exact mixture being used or must conduct a phytotoxicity trial before using this product with any mixture. Use the product at rates indicated below for use as a deposition aid.

Mix all other ingredients thoroughly and completely then add **CROSSFIRE** last when used as a deposition aid.

APPLICATION RATES

The following rates are recommended but higher or low rates may be used if they are allowed by the main label.

Ground: 1 – 4 pints per acre.

Use with 5 – 30 gallons of spray.

Air: 6 – 12 ounces per acre at a minimum of 1%v/v

Manufactured For:

TRIANGLE CHEMICAL COMPANY
MACON, GEORGIA
CARDINAL CHEMICALS, INC.
KINSTON, NC
