Boron (B)	0.5%
Derived from: Calcium glucoheptonate and boric acid.	

GENERAL INFORMATION

CAL-BOR is a plant available liquid foliar nutritional formulation designed to correct and/or prevent deficiencies of calcium and boron in crops. CAL-BOR is dual complexed and engineered for maximum tank mix compatibility and plant absorption, CAL-BOR is especially beneficial during periods of rapid growth and fruit sizing. CAL-BOR is intended to be used as part of a comprehensive fertility program but is not intended to supply all nutrient requirements of calcium and boron or to adjust soil pH. ****Caution: A jar test is recommended to test compatibility when new or unfamiliar tank mix combinations are used. Do not mix with foliar or ground applied liquid fertilizers containing phosphates or polyphosphates. When used as directed this product does not supply all the nutrients required by plants and is designed to supplement a soil fertility plan.****
